SUMMARY

Computer Science undergraduate at **IIIT Kota**, graduating in **2027**, with strong foundations in **Data Structures & Algorithms**, **software engineering**, and **system design**. Passionate about building **scalable and production-oriented applications**, with hands-on experience developing full-stack products and designing **real-time, distributed, and event-driven systems**.

PROJECTS

DevTinder: Social Networking Platform | *MERN—Kafka—gRPC—Redis—AWS* | [GitHub](#) | [Live](#) Jan 2026

- Architected a scalable platform behind an **Nginx Load Balancer**, integrating **Razorpay** for subscriptions, for the media storage **AWS S3**, and **Redux Toolkit** for global state.
- Engineered a distributed **real-time chat** across multiple Node.js nodes, utilizing **Redis** for centralized sessions and **gRPC** for low-latency, cross-server message routing.
- Transitioned to an Event-Driven Architecture with **Apache Kafka**, ensuring message durability via offline queues, and optimizing online presence tracking by reducing $O(N^2)$ broadcast overheads to $O(1)$ targeted events.
- Streamlined operations by offloading emails (**AWS SES**) to a **Bull (Redis)** background queue, and deployed on **AWS EC2** with **PM2 & Cloudflare SSL** for high availability.

BuddyBoard: Collaborative Productivity Platform | *Next.js—Tailwind—Firebase* | [GitHub](#) | [Live](#) Feb 2026

- Architected a real-time productivity app using **Next.js** and **Firebase Firestore**, engineering live data sync for a secure **user pairing** and **group collaboration** via a custom invitation system.
- Developed categorized task management featuring **real-time timers** (Deep Work, Growth, Chores), and visualized user progress trends using interactive **Recharts** with brush-based time filtering.
- Integrated engagement drivers including an auto-saving **notes** editor, **goal tracking**, and a **streak system**, managing complex client-side state across dynamic UI components.
- Designed a polished, theme-aware UI with **Tailwind CSS** and **Framer Motion**, implementing engaging animations (card-flips, overlays) and a highly responsive **dark mode**.

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript, TypeScript

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Shadcn UI, Redux Toolkit, Zustand, TanStack React Query, Socket.io, Better Auth, Clerk

Databases & ORMs: MongoDB, MySQL, PostgreSQL, Redis, Prisma, Drizzle

Tools, Platform & Architecture: Git, GitHub, Postman, Linux, Docker, Cloudinary, AWS, Kafka, gRPC, Microservices, System Design (HLD).

COURSES AND CERTIFICATIONS

Delta 5.0 – Full Stack Web Development (MERN Stack), Apna College | [Certificate](#) 2024

Job Ready AI-Powered Cohort: Web Development + DSA + Aptitude
Sheryians Coding School | [Certificate](#) 2025

Complete React and NextJS Course – Udemy | [Certificate](#) 2026

ACHIEVEMENTS

DSA Practice: Solved **600+** **Data Structures and Algorithms** problems across platforms | [Codolio](#)

Competitive Programming: 2-star with Max_Rating of 1585 at [CodeChef](#) & 1830 Max_rating at [LeetCode](#).

EDUCATION

Indian Institute of Information Technology Kota (IIIT Kota) Kota, Rajasthan
Bachelor of Technology in Computer Science and Engineering, CGPA: 7.58 (till 6th sem) Aug 2023 – Aug 2027

Jagat Taran Golden Jubilee School (CBSE) Prayagraj, U.P.
10th percentage: 91.4% , 12th percentage: 84.2%
